Miami Plastic Surgery Incorporates Dermapen as a new procedure

BY JOSE BOWLES

Miami Plastic Surgery offers the latest, results-oriented treatments to further enhance your innermost beauty and outermost expression. They provide customized treatments that are selected based on your skin's needs, for every aspect of your beauty and wellness regime.

Dermapen is the newest procedure Miami Plastic Surgery has introduced to their long list of treatments. Dermapen is a fractional micro-needling device that works to tighten, lift and rejuvenate the skin. It is effective in reducing fine lines and wrinkles, stretch marks, surgical and acne scars. The fractional micro-needling is the actual procedure the Dermapen completes on the skin, the needles at the end of the pen pierce the skin in a controlled and precise manner. The stamping action of the Dermapen's vertical tip creates micro-injuries to the skin, stimulating new collagen production. Dermapen is safe for all skin types and treatments are completed in a short amount of time with minimal discomfort. It is recommended that 3 to 5 treatments, spaced between 4 to 6 weeks apart, be completed for a full treatment. Benefits of the Dermapen can be seen after just one treatment.

Karina Soave had her first Dermapen procedure on March 13 and saw instant results after the first session. She began her treatment with Tanya Patron, PA-C and Josephine Hernandez, Medical Aesthetician and could not be any happier.

"I immediately saw a difference in the area I had treated and look forward to completing my treatments. I am so glad I trusted my friends and their recommendation to come to Miami Plastic Surgery, they have a great team," adds Karina. Miami Plastic Surgery has an excellent team of trained professionals who make sure each patient receives the best treatments. Tanya and Josephine exemplify professionalism and

care every single day.

Miami Plastic Surgery also has a long list of award winning procedures. Their facial treatments include their deep pore cleansing facial, oxygen treatment facial and their popular HydraFacial. The HydraFacial treatment is the only hydradermabrasion procedure that combines cleansing, exfoliation, extraction, hydration and antioxidant protection simultaneously, resulting in clearer, more beautiful skin. Another very popular treatment is their Coolsculpting, which is a non-surgical treatment that freezes stubborn fat, and then is naturally eliminated from your body. Coolsculpting involves no needles, surgery and no downtime. This procedure has been featured on *Allure Magazine*, *Shape Magazine* and *The Today Show*.

Dermapen used for treatment.

Dr. Michael E. Kelly, Dr. Johnny Franco and Dr. Carlos L. Wolf lead Miami Plastic Surgery and their patients rave about them and their staff. Miami Plastic Surgery has two offices, located in Kendall and Coral Gables.
